

**UNLOCK YOUR
WELLNESS WITH
SUPERPOWER**

Your body is always speaking, and Superpower helps you finally understand what it's saying. Superpower is a health and wellness company focused on making advanced biomarker testing simple, accessible, and actionable for everyone. Their mission is to give people clear insights into their bodies without the complexity or cost of traditional medical testing.

HOW IT WORKS

With a simple 15-minute blood draw, either at one of over 2,000 partner labs nationwide or from the comfort of your own home, Superpower measures 100+ biomarkers that influence your energy, hormones, stress, sleep, and overall well-being. This includes metabolic health (including blood sugar, insulin, and A1C), heart and vascular health (like cholesterol, triglycerides, and ApoB), hormone balance (including estrogen, testosterone, SHBG, and cortisol), thyroid function (TSH, T3, and T4), liver and kidney health, inflammation levels, nutrient status (such as vitamin D, iron, and B12), immune system markers, and key indicators of energy and longevity.

WHAT THE RESULTS WILL TELL YOU

In 5–10 days, you will receive a simple, easy-to-read wellness report that highlights what is supporting your health and what may need more care. There is no medical jargon because your results are explained in a way that matches your comfort level and gives you real clarity.

Once your sample is analyzed, you will receive an easy-to-understand report and personalized health plan that includes tailored recommendations for diet, lifestyle changes, and supplements. Beyond testing, Superpower offers a connected ecosystem that allows you to book additional diagnostics, purchase curated supplements at members-only discounts, and manage everything through your Superpower dashboard.

HOW MUCH DOES THIS COST?

It is a subscription-based service. For the \$17/month fee (HSA/FSA eligible), you get continuous access to your dashboard, ongoing support, and new tests whenever you need them. You also gain access to Superpower AI, which is a tool that helps explain your results and answer questions in plain, supportive language.

Superpower is one of several companies that are leading the way in personalized health solutions. Biomarker testing and wellness tracking are becoming increasingly common as people look for more control and clarity over their health and wellness.

Whether you are tracking long-term health, addressing symptoms, or simply want a deeper understanding of your body, Superpower gives you the data and the confidence to take the next step.
